

WHERE IT PAYS TO ATTEND COLLEGE

Engineering, and computer science has the highest median starting salary and the salary growth after working for around 10 years is also highest and also same case is in the field of Physical Assistant.

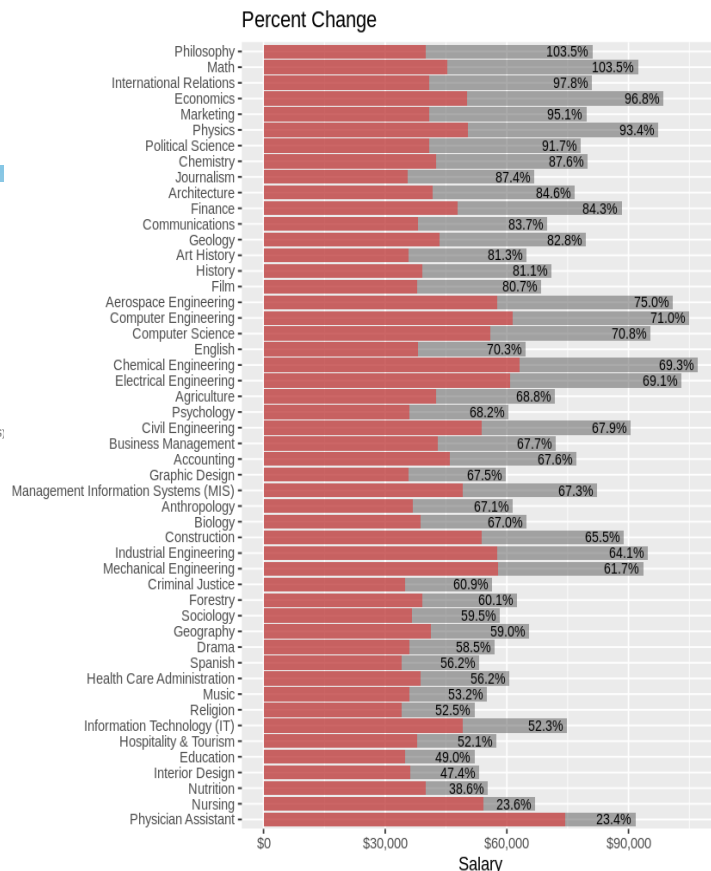

Mean Starting and Mid career median salaries

LIGHT SHADE REFLECTS THE MID-CAREER SALARIES
DARK SHADE REFLECTS THE MEAN STARTING SALARIES

A year-long survey of 1.2 million people with only a bachelor's degree by PayScale Inc. shows that graduates in subjects like Philosophy, and International Relations earned around 103.5% and 97.8% more about 10 years post-commencement. Major that didn't show as much salary growth included Nursing and Information Technology.

The difference between Starting salaries of State School that are a party school, state school that are not appears to be similar, although party schools seem to have a higher mid-career salary than state school.

By School Major: -
If you want the highest starting salary, go for Physician assistant, engineering or Computer Science
For Careers with highest earning potential go for **Finance or Economics.**

By College Type: -
If you are going to a state school, consider one that is a party school
Ivy league and Engineering Schools have the best long term mid-career salary potential followed by Liberal Arts

By Region: -
Try to go to schools in California or the northeast.
If you want a **Liberal Arts** School, the South seems to be slightly better option.
